Dear Project Coordinator,

It is my pleasure to inform you that your project **2009-3905- "Common problem solving strategies as links between mathematics and science"** has been selected as a "success story" by a panel of experts from the Directorate-General for Education and Culture of the European Commission. It has also been marked as such in the Erasmus+ Project Results Platform.

The Erasmus+ Project Results Platform is a database where you can find descriptions and results of projects supported by the European Commission under the Erasmus+ Programme for Education, Training, Youth and Sport, as well as its predecessor programmes.

"Success stories" are finalised projects that have distinguished themselves by their impact, contribution to policy-making, innovative results and/or creative approach and can be a source of inspiration for others. The choice of your project as a success story was made on the basis of a selection process according to rigorous criteria regarding the quality, relevance and results of your project.

As a consequence of this selection, visibility and acknowledgement will be given to your project, for instance on our websites, social media, and when preparing documentation for conferences or other events with high-ranking attendance.

We therefore invite you to upload any additional updated information about your project on the Erasmus+ Project Results Platform in order to give your project even wider visibility.

Please also note that you may be contacted by our external contractor for dissemination and exploitation of results, ECORYS, for additional material related to your project.

I would like to congratulate and thank you and your project partners for your commitment, enthusiasm and high-quality work.

Yours sincerely,

Michal KREJZA
Head of Unit
